Prevent Dump Bed Accidents and Fatalities with Dump-Lok!

Each year, hundreds of serious injuries and fatalities occur when unsecured, or improperly secured, dump beds fall while workers are performing dump truck maintenance. Dump-Lok solves that dangerous problem.

Dump-Lok is an engineering breakthrough in dump truck safety. The Dump-Lok steel braces lock your truck's dump bed in the raised position, preventing it from falling in cases of system failure or operator error. Plus, Dump-Lok safely holds dump beds at angles higher than most dump truck manufacturer body props, giving workers safe access to more areas underneath the dump bed.

DUMP-LOK

Dump Box Safety Stands

Dump-Lok steel braces have been proven in lab tests to support up to 50,000 lbs.

Dump-Lok Specifications

- Overall Height 21 in.
- Overall Width 5.25 in.
- Overall Length. 12.75 in.
- Weight 37.5 lbs.
- Maximum Capacity (Pairs) 50,000 lbs.

The Dump-Lok steel braces are strictly intended to be used as a pair.

- *Dump-Lok can be used universally on any brand of dump box.*
- *Dump-Lok can safely hold dump beds at higher angles than manufacturer props, giving employees safe access to a wider area underneath the dump bed.*
- *Dump-Lok steel braces fit up to a 4.5 inch flange - the standard dump truck flange is 3.5 inches.*
- *Dump-Lok is designed with easy to grip handles, making each steel brace easy to carry and easy to install between the truck frame and dump box.*

1. With truck wheels chocked and dump bed up, set Dump-Lok steel braces on truck frame, one brace on each side between tandem wheels.

2. Place safety chain over bed frame or under truck frame. Slide chain through hole and lock in slot on wheel side.

3. Carefully lower bed onto Dump-Lok and tighten chain in slot.
